

JUSTICE LEAGUE PLAYBOOK

GOTHAM RETURN PROTOCOL

● THE WORLD

- You're inside an enemy-controlled zone
- You already have the package
- Now you must escape to Gotham

No distractions. No extra heroes.

JUST PRECISION vs PRESSURE

OFFENSE — ESCAPE UNIT

BATMAN — QUARTERBACK (THE MIND)

- Calls the play
- Reads the defense
- Decides where the package goes
- He is the brain of the mission

No panic.
No wasted motion.

THE FLASH — RECEIVERS (THE ESCAPE PATHS)

- Burst into open space
- Stretch the defense thin
- Create lanes out of nothing
- They force the field to open

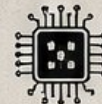

Without them → no escape routes

CYBORG — RECEIVERS (THE SYSTEM BREAKERS)

- Read defensive patterns instantly
- Find weak points
- Adjust routes mid-play
- They don't just run...
→ they solve the field in real time

THE RUNNER — THE CARRIER

- Holds the package
- Takes every hit
- Pushes forward
- This is the heart of the mission

Everything depends on this role staying alive and moving.

DEFENSE — AMAZON WAR UNIT

WONDER WOMAN + AMAZONS

- Elite, disciplined fighters
- Perfect tackling form
- No hesitation
- They are not reckless
- They are trained to stop escape

● HOW THEY FEEL

- Close space instantly
- Punish mistakes
- Collapse lanes

Facing them feels like:

"YOU'RE NOT SUPPOSED TO GET OUT."

HOW A PLAY RUNS (CLEAN + CINEMATIC)

1 SNAP

Batman receives the ball
→ instantly scans

2 ROUTES OPEN

Flash units explode forward
Cyborg units adjust angles
→ space starts forming

3 DECISION

Batman chooses:
• Quick pass → Flash (speed escape)
• Smart route → Cyborg (precision break)
• Handoff → Runner (force through)

4 COLLISION

Amazons crash in
• tackles land
• routes tighten
• pressure peaks

5 BREAK

One gap opens.
Not big.
→ Just enough.

6 TOUCHDOWN

You cross.
Not flashy.
→ Just complete.

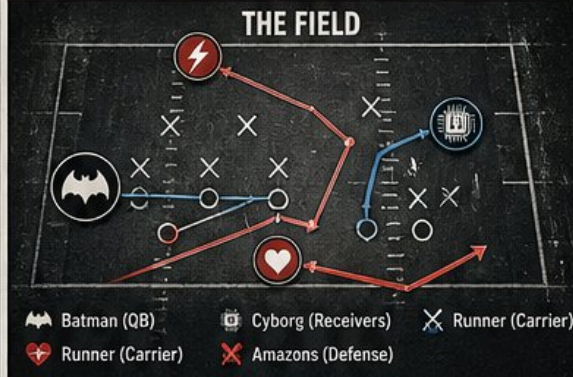

WHY THIS VERSION HITS HARDER

- BATMAN = CONTROL
- FLASH = SPEED
- CYBORG = INTELLIGENCE
- AMAZONS = DISCIPLINE
- RUNNER = ENDURANCE

No overpowered chaos.

JUST EXECUTION UNDER PRESSURE.

THE FIELD
